Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, 17-21, 33, and 34 are drawn to gateways between networks, classified in class 370, subclass 401.
 - II. Claims 6-7, and 22-23 are drawn to processing address header for routing, classified in class 370, subclass 392.
 - III. Claims 8-13, and 24-28 are drawn to control of data admission to the network, classified in class 370, subclass 230.
 - IV. Claims 14-16, and 30-32 are drawn to particular switching network arrangement, classified in class 370, subclass 386.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I is concerned with a packet processing system having packet parser functions to be distributed throughout the system; invention II is concerned with a packet processing system with an egress mirroring function is provided to the system; invention III is concerned with a packet processing system in which a multi-dimensional quality of service indicator for a packet is provided, while invention IV is concerned with a cascaded combination of multiple, replicated packet processing system. See MPEP § 806.05(d).

3. Because these invention are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.
4. During a telephone conversation with Viola T. Kungn (P: 650-798-3570) on July-17-2007, a provisional election was made without traverse to prosecute the invention of the group I, claims 1-5, 17-21, and 33-34.

EXAMINER 'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Viola T. Kung on 07-18-07.

Reason for Allowance

6. Regarding claims 1-5, 17-21, and 33-34, the prior art fails to teach or suggest a packet modification system comprising: a second packet parser for parsing a packet derived from the classified packet and providing second data representative thereof; a packet modification engine for modifying some or all of the packet responsive to the second data; a third packet parser for parsing the modified packet and providing third data representative thereof; and a packet post-processor for processing the modified packet responsive to the third data, in combination with other limitations, as specified in the independent claims 1, 17, 33, and 34.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
